PROFESSIONAL SUMMARY

CCNA 200-301 certified Computer Science graduate (CGPA 3.51, August 2026) with software testing and security-support experience across 38 weeks of IT internships. Authored formal test cases as an appointed system analyst, executed unit and integration testing across a self-built application, ran the full defect lifecycle on a live helpdesk system, and supported vulnerability assessment and access-control work inside a national bank. Available immediately.

EDUCATION

Bachelor of Computer Science (Hons.) — UiTM Cawangan Terengganu, Kampus Kuala Terengganu **Apr 2024 – Aug 2026**
CGPA 3.51 • Dean's List in 3 semesters • Graduated August 2026

Relevant subjects: Software Engineering • System Analysis and Design • Information System Development • Database Engineering • Web and Mobile Application Development

Diploma in Computer Science — UiTM Cawangan Kelantan, Kampus Machang **Aug 2021 – Jan 2024**
CGPA 3.31 • Dean's List in 2 semesters

PROFESSIONAL EXPERIENCE

Business Analyst Intern — Agrobank, IT Service Management Department **March – July 2026**

- Executed unit tests across all component layers of a self-built change-request system and ran full system verification before sign-off, clearing every routing and database model defect found.
- Traced a multi-day integration defect through 3 modules to isolate root cause, then retested to confirm the fix held before closing it out.
- Implemented authentication and role-based access control for 3 user roles with permission-scoped views, applying least-privilege principles so users saw only their own scope.
- Coordinated vulnerability assessment with the Network Section over 5 days of scheduled scanning, compiling asset inventory so findings routed to system owners for remediation.
- Enforced input validation through Zod schemas on a 5-section intake form, rejecting malformed data at entry rather than surfacing it downstream.

IT Intern — Perbadanan Kemajuan Iktisad Negeri Kelantan (PKINK), IT Department **Sept 2023 – Feb 2024**

- Ran the full defect lifecycle on the organisation helpdesk system over 4 sessions — reproducing, logging, fixing and retesting each issue — restoring ticket-logging functionality.
- Identified and documented website defects over 2 days of structured review, logging each into a formal defect report that fed a system enhancement effort.
- Wrote a Dart integration test verifying data flow between the Flutter client and MySQL backend, catching connection failures before wider testing began.
- Specified 6 functional and 6 non-functional requirements covering usability, concurrent-user performance, restricted access, scalability, reliability and device compatibility, giving every requirement a testable acceptance condition.
- Provisioned user accounts under approved access-control and password standards, keeping privilege assignment consistent across 4 internal systems.

SKILLS

Quality Assurance and Testing: Test case design • Test planning • Test execution • Manual testing • Functional testing • Regression testing • Integration testing • Unit testing • System verification • Defect lifecycle management • Defect logging and reporting • Root-cause analysis • Acceptance criteria definition • Requirements traceability • Test documentation • SDLC and STLC

Security and Access Control: Vulnerability assessment coordination • Access-control procedures • Role-based access control • Least-privilege permission design • Authentication implementation • Input validation and sanitisation • Credential and password standards • Asset and device inventory • CCNA 200-301 security fundamentals

Analysis and Documentation: Software Requirement Specification (SRS) • User Requirements Specification (URS) • Functional and non-functional requirements • Data Flow Diagrams • Entity Relationship Diagrams • Use case modelling • Change request tracking • Comparative document analysis • Defect reports

Technical: SQL • MySQL • MariaDB • SQLite • Prisma ORM • Python • JavaScript • Dart • PHP • Java • C++ • Next.js • React • Flutter • Flask • Zod • XAMPP • Git and GitHub

Languages: Malay (native) • English (intermediate, MUET Band 3.5) • Arabic and Mandarin (basic)

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- CCNA 200-301, Implementing and Administering Cisco Solutions, Nexperits Academy Sdn Bhd, 2023
- Certified Robotic Tutor, Jazro Robotic Academy, MDEC mydigitalmaker programme, 2023

TESTING AND SECURITY PROJECTS

5M Library Management System — Role: System Analyst | Information System Development (ISP250) **2023**

- Appointed system analyst in a 5-member team, authoring the test cases, feasibility study, system objectives and functional and non-functional specifications, tracing each test back to a stated requirement.

Change Request Management System — Agrobank Internship Project | Next.js, Prisma, SQLite **2026**

- Built and tested a change-request tracker with role-based access for 3 roles, Zod form validation, a 5-stage approval workflow and an audit log capturing every status change. Unit tested across all components.

File Scanner Mobile Application — PKINK Industrial Training | Flutter, Dart, MySQL **2024**

- Built and tested a QR-based tracking application across 3 integrated modules, verified against a MySQL backend with an integration test before handover.

LEADERSHIP AND ACTIVITIES

- Programme Leader, AI and Cybersecurity Webinar Series, UiTM Terengganu, 2025. Led 4 committees across technical operations, promotion, certification and event delivery.
- Football, Sukan Antara Fakulti (SUPRO) — Champion 2026
